ALL-IN-ONE CAR RENTAL SYSTEM

1 AI DRIVEN DYNAMIC PRICING.
Rent at the best price.
Increase revenue with AI that adapts rates in real time based on availability and cancellations.

2 CONTROLLED FREESALE. Overbooking is no longer a surprise.
Availability becomes dynamic, reliable, and high-performing even in Freesale mode.

3 REVENUE MANAGEMENT. Maximize every booking.
Monitor revenue in real time, evaluate margins, and update rates with a single click.

4 AI & AUTOMATIONS. Leverage your Virtual Assistant.
Simplify everything: automate workflows, notifications, and controls to boost efficiency.

5 BROKER CONNECTION. Hub for online sales.
Centralize rentals from OTAs, brokers, and partners in a single intuitive dashboard.

6 DATA SYNC & SHARING. One shared source for all.
Fleet, rates, portals, and customer data seamlessly communicate in real time.

7 EASY ONBOARDING. Eliminate data entry time.
Instantly transform complex documents into structured, ready-to-use data.

8 NEW DISPUTE MANAGEMENT SYSTEM. From report to resolution in a single upload.
Simplify, speed up, and delegate. Upload the report or any document and let the system handle the rest.

9 INTELLIGENT TEMPLATES. DYNAMIC VARIABLES. MULTILINGUAL OPTIONS. Dynamic personalization and instant translations.
Prepare contracts, emails, and documents that auto-fill with specific rental and customer data.

MODULAR FOR SEAMLESS SCALING. Choose, activate, use. Pay only for what you need.
Modules designed to simplify, automate, and lighten key processes of your business.

AI Driven Dynamic Pricing.

Rent at the best price.

Increase your **revenue** with **AI** that adjusts **rates** in **real time** based on **availability** and **cancellations**.
Forget **endless manual updates** to **prices**, **rate lists**, and **promotional packages** every time **market conditions** change.

Become more **competitive** with **proactive price management**: the **system's** intelligence **automatically** and **instantly adapts** to **market fluctuations**, showing exactly what **you decide**.

Easily **instruct** the system how to **behave**. Segment your **rental rate lists** by **category**. Decide **who** should **see** which application **timings**. Once trained, the system is **ready** to **use** but always open to your **modifications**.

With **AI continuously learning**, you refine your **sales strategies** based on the results achieved.
Every **new data point feeds** the system, enabling it to **suggest** the **best adjustments** - which you are free to **apply** or **ignore** with a single click.

Let the **AI** do the heavy lifting for you, **updating data** across all **connected devices** and showing **real**-**time price variations** based on:
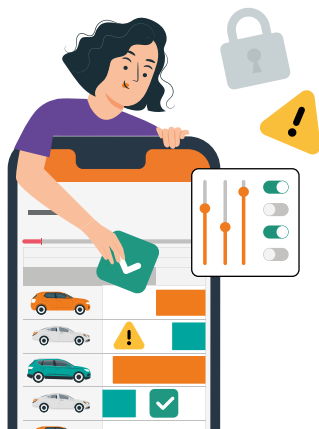

- the corresponding **broker**,
- current **availability**,
- rental **duration**,
- number of **bookings** received,
- number of **searches**,
- **cancellations** you're receiving,

and many other **customizable** and **easily replicable parameters**.

Controlled Freesale.

Amplify your commercial offer.

Overbooking is no longer an unexpected problem: **availability** becomes **dynamic** and **reliable** even in **Freesale** mode.
Be **strategic**. Display **more vehicles** of the **same category** to increase the number of **results shown** on your online **Booking Engine**, as well as on connected **partner** and **broker** portals.
The **system's intelligence** only proposes **options** as long as at least **one vehicle in the category** is genuinely available.

A **competitive advantage** in **broker**-connected sales, where the offer is often overcrowded. This way, you **expand** the **visibility** of your **vehicles** and **increase the chances of conversion**, without losing control : the **Visual Planning** always reflects the **fleet's real availability**. Don't suffer the market: anticipate it.
Change your sales approach. Maximize vehicle utilization with **precision tools**.

Revenue Management.

Maximize every booking.

Monitor revenues in real-time, **evaluate margins**, and **adjust rates** with a click.
Every **booking** is an opportunity to sell at the **highest margin**. Respond **promptly** to **market** fluctuations.

Leverage **advanced KPIs** to assess **performance**, **profitability**, and fleet **utilization**.

Make **dynamic decisions** based on **concrete data**.
Make your **commercial strategy** more **profitable.**
Identify the best pricing opportunities. **Improve** your sales strategies. **Unlock** your untapped earning potential.

AI & Automations.

Leverage your Virtual Assistant.

Simplify everything: automate workflows, notifications, and controls to boost efficiency. **Unlock** the **potential** of your **Virtual Assistant**, designed to **streamline** every **operational** aspect. **Simplify** complexity. **Turn** inefficiency into efficiency. **Automate** manual actions. **Anticipate** timing.

Enhance controls on documents and vehicles. **Reduce** workload.

The management system is your **Virtual Assistant**, helping you easily scale **operations**, **transactions**, and **rentals**.

Broker Connection.

The hub for your online sales.

Centralize rentals from **OTAs**, **brokers**, and **partners** into a single intuitive dashboard. **Expanding** your **sales network** has never been **easier**. Forget the jungle of platforms and different interfaces. **Connect**. **Manage**. **Earn**. Eliminate fragmentation.

Control every channel from **one panel** and multiply collaborations, visibility, and bookings. Your **management system** is your **strategic hub**: **monitor** performance, **centralize** collaborations, and **maximize** every market opportunity.

Data Sync & Sharing.
A single shared source for everyone.

Fleet, rates, portals, and customer **data communicate seamlessly** in **real time**. **Eliminate paper** archives, **scattered** documents, and **fragmented** information. The **intelligence** of the **management system** stores every piece of **information** in a **single**, **shared**, **synchronized** environment **accessible** from every function within the rental business.
Practically, this means faster, more informed, and conscious decisions. Zero discrepancies, errors, or oversights.
An operational management that benefits from a **comprehensive view**—always **available**, always **up to date**.

Easy Onboarding System.
Automatic data recognition and completion.

Digitize your rental process. Eliminate data entry time. It takes just a **moment** to **transform** complex **documents** into structured, **ready-to-use data**. **Forget** typing **errors**. Avoid **wasted time** on manual input.

Use the Easy Onboarding **recognition system**. The **management software** reads, interprets, and fills in data automatically for you. Ensures maximum **accuracy** in **capturing** information, **converting** it into data, and **auto-filling**—all in a single action.

Speeds up the entire **registration** process. Provide your customers with a **memorable** rental **experience** from the very first contact.

New Dispute Management System.

From report to resolution in a single upload.

Simplify, speed up, and delegate: upload the report and let the management system do the rest.

Turn problems into solutions with the **New Dispute Management System**. Upload the **document** and let the **software's intelligence automatically** extract all necessary **information** to **pre-fill** the **dispute**.

Resolve every **dispute efficiently**, **quickly**, and with surgical **precision** — from **creation** to **resolution** in just a few **clicks**.

Intelligent Templates. Dynamic Variables. Multilingual Options.

Dynamic customizations and instant translations.

Prepare contracts, emails, and documents that automatically **fill themselves** with **specific data** for each **rental** and **client**. The **right message**, at the **right time**, to the **right person**.

Whether it's a contract or a confirmation, the **communication automatically** adapts to the **client's information** and the **rental** stage. **Local** or **international**: always **relevant** in information, **timely** in delivery, and **clear** for foreign clients with automatic translations in the active languages of your management system.

Create **tailored templates** with **dynamic variables**. Every message adapts to the context. **Communicate better**. **Communicate more**.

MODULAR FOR SEAMLESS SCALING.

Choose, activate, use.
And pay only for what you really need.
Build your system **tailored** to your real **requirements**. Each module is designed to **simplify**, **automate**, and **lighten** the key processes of your business. The system's **modularity** lets you **combine** all the **functionalities** you truly need.

Master the Complexity of Vehicle Rental.

FLEET MANAGEMENT.

Make your fleet more **productive**. **Centralized**, **dynamic**, and **interactive** view with the graphical **Visual Planning**. Automated processes, tracked **vehicles**, advanced **deadlines**, **documents** always in place. So your fleet works for you.

BOOKING ENGINE.

More **revenue** with online **commerce**. From **search** to **online payment** in an **intuitive**, **fast**, and **responsive flow** on any device. Plus **real-time data updates**: **no more overbooking!**

WORKSHOP ORDERS.

Centralize the **manage-ment** of your **vehicle** maintenance.

Record and **monitor** all **repair activities**, whether **performed in-house** or **outsourced**.

ELECTRONIC INVOICING.

At the end of the rental, the system automatically **generates** and **sends** the **invoice** via **email**, **SMS**, or **WhatsApp**. Always compliant with **national regulations** and **synchronized** with the **tax systems** of the issuing country.

AUTOMATIC INVOICING.

The system **creates** and **sends** invoices **automatically**, without manual steps. A single traceable, compliant process shareable with your tax consultant.

DIGITAL SIGNATURE.

Sign contracts and **documents digitally**, securely, and compliantly, even **remotely**.
Eliminate paperwork and manual handling. Choose between **OTP signature** via SMS for **remote confirmations** or **Advanced Graphometric Signature** for in-person signing. Legal validity and certified traceability.

ASSISTED PICK-UP AND DROP-OFF.

Workflow with **new features** for **greater efficiency**: **eliminate repetition**, **halve** the **times**, easily **identify damages**, and **send** prompt **charge notifications** to the customer.

SMART CHECK-IN.

Speed up vehicle pick-up with a **digital** and **interactive process** that lets the customer assist you by **uploading** data in **advance** and **remotely**, cutting check-out **times** by **half**.

365 ID DOCUMENT SCANNER.

Documents **read**. Data **filled**. Error-free entry. **Scan** the document to automatically **fill in** all related **personal data** fields. Instant document **validity check**. **Save** the scan **image** in your management system.

Connect. Centralize. Monetize.

BROKER CONNECTION.

Enables your management system to **communicate** with **multiple external platforms simultaneously**, **automatically**, and in **real time** - **no more overbooking**. **Integrated** with the **leading industry brokers** and ready to **connect** with any other **partner** you choose. **Multiply** your **bookings** by **automating** the **connection** with **multiple** online **platforms**.

Connected brokers, ready to use:
- RentCars.com
- CarJet.com | DoYouSpain.com
- DiscoverCars.com
- AutoEurope.it
- EconomyCarRentals.com
- EnjoyTravel.com
- Rent.it
- Rentalcars.com
- TiNoleggio.it
- WiseCars.com

CAR RENTAL MARKETPLACE.

Coordinate multiple rental businesses **seamlessly** on **your platform**: your personalized **Marketplace** built according to your **specific needs** and **guidelines**.

MARKETING AUTOMATION.

Automated communication flows via **email**, **SMS**, or **WhatsApp**. Manage **different scenarios** with **targeted messages**: **remind** customers to take **action**, **send** marketing promotions, **trigger** follow-ups, or **prompt** debt recovery.

PARTNER APP.

Simplified management of your **commercial partners**. Allow them access to the **Web App** to **independently book** rentals, **monitor activities**, and **view statistical data**.

VIRTUAL POS & PHYSICAL POS.

Unify **payment** and **card pre-authorization management**, both **online** and **in-person**. Leverage the **combined flexibility** of **Virtual POS** alongside **Physical POS** to offer more **contactless options**.

AUTOMATIC UPSELLING.

Boost **sales** with **add-on** services. **Dynamic** and **automatic up-sell** and **cross-sell** mechanisms **presented** to customers throughout their **online booking journey** and during **check-in**.

Evolve. Innovate. Anticipate. Scale your business.

AUTOMATIC KEY EXCHANGE.

Vehicle **pick-up** and **drop-off without time limits** and without additional **staff**, thanks to an **automated flow** of **instructions sent** to the customer for **key collection** at the **pick-up point**.

AUTOMATED RENTAL.

Self-service car rental with no **time** restrictions and no **extra personnel**. The system guides the customer with precise **instructions** at every step: **check-in**, **digital contract signing**, and **key collection** at **the pick-up location** or **inside** the **vehicle**.

GPS TRACKING.

Protect your **investment**. Access **real-time** information on **location**, **mileage**, and **fuel consumption**. **Remotely control** the **engine** and vehicle **doors**. **Receive** timely **notifictions throughout** the rental in case of unauthorized **movements** or **tampering** attempts.

NET PROMOTER SCORE.

Measure customer **satisfaction** with **NPS feedback surveys**. **Highly visual**, easy to **create** and **send** to customers to identify **areas** for **improvement**.

MULTILINGUAL SUPPORT.

Solutions for rental companies with **international clients** to easily manage the **creation** of different types of **documents**, in **multiple languages**, **automatically sent** by the **system**.

SIMPLIFY.

An All-In-One solution that simplifies your work and multiplies your results.

CONTROL.

From the first contact to vehicle return, keep every booking, detail, cost, and process under real-time control.

AUTOMATE.

Automate key processes and eliminate repetitive back-office tasks.

THE MANAGEMENT SOFTWARE THAT WORKS FOR YOU.

GROW.

Scale your ambitions: increasing volumes of vehicles, bookings, and customers without ever sacrificing performance and control.

MONETIZE.

Boost your revenue with smart selling strategies: upselling and cross-selling.

DECIDE.

Graphic dashboards, widgets, interactive reports, and advanced KPIs. Identify strategic opportunities with key data from your operational, administrative, and financial performance.
